In Reply Refer To:

HSST/B-201A

Mr. Bret Eckert P.E.
Engineering Applications Manager
Trinity Highway Products
3617 Cincinnati Avenue
Rocklin, CA  95677

Dear Mr. Eckert:

This letter is in response to your December 16, 2015 request for the Federal Highway Administration (FHWA) to review a roadside safety device, hardware, or system for eligibility for reimbursement under the Federal-aid highway program. This FHWA letter of eligibility is assigned FHWA control number B-201A and is valid until a subsequent letter is issued by FHWA that expressly references this device.

**Decision**

The following devices are eligible, with details provided in the form which is attached as an integral part of this letter:

- Vulcan® Gate Modification

**Scope of this Letter**

To be found eligible for Federal-aid funding, modified roadside safety devices should meet the crash test and evaluation criteria contained in the National Cooperative Highway Research Program (NCHRP) Report 350. However, the FHWA, the Department of Transportation, and the United States Government do not regulate the manufacture of roadside safety devices. Eligibility for reimbursement under the Federal-aid highway program does not establish approval, certification or endorsement of the device for any particular purpose or use.

This letter is not a determination by the FHWA, the Department of Transportation, or the United States Government that a vehicle crash involving the device will result in any particular outcome, nor is it a guarantee of the in-service performance of this device. Proper manufacturing, installation, and maintenance are required in order for this device to function as tested.

This finding of eligibility is limited to the crashworthiness of the system and does not cover other structural features, nor conformity with the Manual on Uniform Traffic Control Devices.
Eligibility for Reimbursement

FHWA previously issued an eligibility letter for the roadside safety system described in your pending request. Your pending request now identifies a modification to that roadside safety system.

The original roadside safety device information is:

- Name of system: Vulcan® Gate
- Type of system: Barrier
- Date of original request: July 1, 2009
- Date of original FHWA eligibility letter: January 12, 2010
- FHWA Control number: B-201

The pending modification(s) consists of the following changes:
1. The Latch Hinge pin use in the hinge during gate opening has been modified to be adjustable to align with the hinge points. The part is in a stored position when the gate is closed and performing as a longitudinal barrier. The Latch Hinge pin has no effect on Vulcan® Gate impact performance.

FHWA concurs with the recommendation of the accredited crash testing laboratory as stated within the attached form.

Full Description of the Eligible Device

The device and supporting documentation, including reports of the crash tests or other testing done, videos of any crash testing, and/or drawings of the device, are described in the attached form.

Notice

If a manufacturer makes any modification to any of their roadside safety hardware that has an existing eligibility letter from FHWA, the manufacturer must notify FHWA of such modification with a request for continued eligibility for reimbursement. The notice of all modifications to a device must be accompanied by:

- Significant modifications – For these modifications, crash test results must be submitted with accompanying documentation and videos.
- Non-signification modifications – For these modifications, a statement from the crash test laboratory on the potential effect of the modification on the ability of the device to meet the relevant crash test criteria.

FHWA's determination of continued eligibility for the modified hardware will be based on whether the modified hardware will continue to meet the relevant crash test criteria.
You are expected to supply potential users with sufficient information on design, installation and maintenance requirements to ensure proper performance.

You are expected to certify to potential users that the hardware furnished has the same chemistry, mechanical properties, and geometry as that submitted for review, and that it will meet the test and evaluation criteria of the NCHRP Report 350.

Issuance of this letter does not convey property rights of any sort or any exclusive privilege. This letter is based on the premise that information and reports submitted by you are accurate and correct. We reserve the right to modify or revoke this letter if: (1) there are any inaccuracies in the information submitted in support of your request for this letter, (2) the qualification testing was flawed, (3) in-service performance or other information reveals safety problems, (4) the system is significantly different from the version that was crash tested, or (5) any other information indicates that the letter was issued in error or otherwise does not reflect full and complete information about the crashworthiness of the system.

**Standard Provisions**

- To prevent misunderstanding by others, this letter of eligibility designated as FHWA control number B-201A shall not be reproduced except in full. This letter and the test documentation upon which it is based are public information. All such letters and documentation may be reviewed upon request.

- This letter shall not be construed as authorization or consent by the FHWA to use, manufacture, or sell any patented system for which the applicant is not the patent holder.

- If the subject device is a patented product it may be considered to be proprietary. If proprietary systems are specified by a highway agency for use on Federal-aid projects: (a) they must be supplied through competitive bidding with equally suitable unpatented items; (b) the highway agency must certify that they are essential for synchronization with the existing highway facilities or that no equally suitable alternative exists; or (c) they must be used for research or for a distinctive type of construction on relatively short sections of road for experimental purposes. Our regulations concerning proprietary products are contained in Title 23, Code of Federal Regulations, Section 635.411.

Sincerely yours,

Michael S. Griffith
Director, Office of Safety Technologies
Office of Safety

Enclosures
Request for Federal Aid Reimbursement Eligibility of Highway Safety Hardware

Date of Request: March 14, 2016

Name: Bret R. Eckert, P.E.
Company: Trinity Highway Products, LLC
Address: 3617 Cincinnati Avenue, Rocklin CA 95765
Country: USA
To: Michael S. Griffith, Director
FHWA, Office of Safety Technologies

I request the following devices be considered eligible for reimbursement under the Federal-aid highway program.

By submitting this request for review and evaluation by the Federal Highway Administration, I certify that the product(s) was (were) tested in conformity with the NCHRP Report 350 (Report 350) and that the evaluation results meet the appropriate evaluation criteria in the Report 350.

Identification of the individual or organization responsible for the product:

Contact Name: Don Pyde
Company Name: Trinity Highway Products, LLC
Address: 70 West Madison Street, Suite 2350, Chicago, IL 60602
Country: USA

Enter below all disclosures of financial interests as required by the FHWA 'Federal-Aid Reimbursement Eligibility Process for Safety Hardware Devices' document.

The Vulcan® Gate is the commercial embodiment of intellectual property that is protected by patents that are owned by SafeRoads Pty. Ltd and Trinity Highway Products LLC (THP). SafeRoads Pty. Ltd. licenses the right to sell that commercial embodiment, known as the Vulcan® Barrier system to THP. The associated United States Patent Office patent number for the Vulcan® Barrier (8,393,822) is assigned to SafeRoads Pty. Ltd. The Vulcan® Gate patent number (8,647,012) is assigned to THP.

EAS sponsored certain crash tests of the Vulcan® Gate. Such tests were conducted by E-Tech Testing Services, an independent, wholly-owned subsidiary of THP. E-Tech Testing Services is an International Standards Organization ("ISO") 17025 accredited laboratory with American Association for Laboratory Accreditation (A2LA) Mechanical Testing certificate 989.01. Full-scale crash testing on the Vulcan® Gate was performed in accordance with testing criteria, as set forth by the National Cooperative Highway Research Program ("NCHRP") in the NCHRP Report 350 (1993).
## PRODUCT DESCRIPTION

<table>
<thead>
<tr>
<th>C: New Hardware or Significant Modification</th>
<th>C: Modification to Existing Hardware</th>
<th>Non-Significant</th>
</tr>
</thead>
</table>

Original submission date December 22, 2015. The Vulcan® Barrier was originally accepted on February 14, 2005 with FHWA eligibility letter HSA-10/B-134 as a NCHRP 350 TL-3 Longitudinal barrier. It was subsequently accepted for use with a Vulcan® to CMB transition on November 17, 2005 with FHWA eligibility letter HSA-10/B-134C as a NCHRP 350 TL-3 longitudinal barrier. Additionally FHWA eligibility letter HSA-10/B-134D, apply to the Vulcan® Barrier for TL-4 use. The Vulcan® Gate was accepted on January 12, 2010 with FHWA eligibility letter HSSD/B-201. The Vulcan® Gate is a NCHRP 350 TL-2, TL-3 and TL-4 redirective, longitudinal barrier that opens as a gate.

This request for continued eligibility is to notify the FHWA of necessary revisions that have occurred since May 18, 2015. All revisions have been justified through engineering analysis and judgment and have since been determined to be non-significant and will have no bearing on the as-tested performance of the system. These revisions include the following:

1. The Latch Hinge pin use in the hinge during gate opening has been modified to be adjustable to align with the hinge points. The part is in a stored position when the gate is closed and performing as a longitudinal barrier. The Latch Hinge pin has no effect on Vulcan® Gate impact performance. (4112)

## CRASH TESTING

</tbody>
</table>
Full Scale Crash Testing was done in compliance with NCHRP Report 350 by the following accredited crash test Laboratory. By signature below, the Laboratory agrees in support of this submission that all critical and relevant crash tests for the device listed above were conducted. (cite the laboratory's accreditation status as noted in the crash test reports.):

| Testing Laboratory's signature concurs that these modifications are considered Non-Significant. |
| Laboratory Name: E-Tech Testing Services, Inc. |
| Laboratory Signature: Paul Kruse |
| Address: 3617B Cincinnati Ave., Rocklin, CA 95765 |
| Country: USA |
| Accreditation Certificate Number and Dates of current Accreditation period: A2LA Certificate # 989.01, November 20, 2015 to November 30, 2017 |

Attach to this form:
1) Additional disclosures of related financial interest as indicated above.
2) A copy of the full test report, video, and a Test Data Summary Sheet for each test conducted in support of this request.
3) A drawing or drawings of the device(s) that conform to the Task Force-13 Drawing Specifications [Hardware Guide Drawing Standards]. For proprietary products, a single isometric line drawing is usually acceptable to illustrate the product, with detailed specifications, intended use, and contact information provided on the reverse. Additional drawings (not in TF-13 format) showing details that are relevant to understanding the dimensions and performance of the device should also be submitted to facilitate our review.
