Mr. Ron Faulkenberry  
Gibraltar Global, LLC.  
1208 Houston Clinton Dr  
Burnet TX 78611  
USA  

Dear Mr. Faulkenberry:

This letter is in response to your January 30, 2020 request for the Federal Highway Administration (FHWA) to review a roadside safety device, hardware, or system for eligibility for reimbursement under the Federal-aid highway program. This FHWA letter of eligibility is assigned FHWA control number CC-162 and is valid until a subsequent letter is issued by FHWA that expressly references this device.

**Decision**

The following device is eligible within the length-of-need, with details provided in the form which is attached as an integral part of this letter:

- TL-3 4 Cable End Terminal

**Scope of this Letter**

To be found eligible for Federal-aid funding, new roadside safety devices should meet the crash test and evaluation criteria contained in the American Association of State Highway and Transportation Officials’ (AASHTO) Manual for Assessing Safety Hardware (MASH). However, the FHWA, the Department of Transportation, and the United States Government do not regulate the manufacture of roadside safety devices. Eligibility for reimbursement under the Federal-aid highway program does not establish approval, certification or endorsement of the device for any particular purpose or use.

This letter is not a determination by the FHWA, the Department of Transportation, or the United States Government that a vehicle crash involving the device will result in any particular outcome, nor is it a guarantee of the in-service performance of this device. Proper manufacturing, installation, and maintenance are required in order for this device to function as tested.

This finding of eligibility is limited to the crashworthiness of the system and does not cover other structural features, nor conformity with the Manual on Uniform Traffic Control Devices.
**Eligibility for Reimbursement**

Based solely on a review of crash test results and certifications submitted by the manufacturer, and the crash test laboratory, FHWA agrees that the device described herein meets the crash test and evaluation criteria of the AASHTO’s MASH. Therefore, the device is eligible for reimbursement under the Federal-aid highway program if installed under the range of tested conditions.

- Name of system: TL-3 4 Cable End Terminal
- Type of system: End Terminal
- Test Level: MASH Test Level 3 (TL3)
- Testing conducted by: Applus IDIADA KARCO Engineering, LLC.
- Date of request: January 30, 2020

FHWA concurs with the recommendation of the accredited crash testing laboratory on the attached form.

**Full Description of the Eligible Device**

The device and supporting documentation, including reports of the crash tests or other testing done, videos of any crash testing, and/or drawings of the device, are described in the attached form.

**Notice**

This eligibility letter is issued for the subject device as tested. Modifications made to the device are not covered by this letter. Any modifications to this device should be submitted to the user (i.e., state DOT) as per their requirements.

You are expected to supply potential users with sufficient information on design, installation and maintenance requirements to ensure proper performance.

You are expected to certify to potential users that the hardware furnished has the same chemistry, mechanical properties, and geometry as that submitted for review, and that it will meet the test and evaluation criteria of AASHTO’s MASH.

Issuance of this letter does not convey property rights of any sort or any exclusive privilege. This letter is based on the premise that information and reports submitted by you are accurate and correct. We reserve the right to modify or revoke this letter if: (1) there are any inaccuracies in the information submitted in support of your request for this letter, (2) the qualification testing was flawed, (3) in-service performance or other information reveals safety problems, (4) the system is significantly different from the version that was crash tested, or (5) any other information indicates that the letter was issued in error or otherwise does not reflect full and complete information about the crashworthiness of the system.
Standard Provisions

- To prevent misunderstanding by others, this letter of eligibility designated as FHWA control number CC-162 shall not be reproduced except in full. This letter and the test documentation upon which it is based are public information. All such letters and documentation may be reviewed upon request.

- This letter shall not be construed as authorization or consent by the FHWA to use, manufacture, or sell any patented system for which the applicant is not the patent holder.

- This FHWA eligibility letter is not an expression of any Agency view, position, or determination of validity, scope, or ownership of any intellectual property rights to a specific device or design. Further, this letter does not impute any distribution or licensing rights to the requester. This FHWA eligibility letter determination is made based solely on the crash-testing information submitted by the requester. The FHWA reserves the right to review and revoke an earlier eligibility determination after receipt of subsequent information related to crash testing.

Sincerely,

Michael S. Griffith
Director, Office of Safety Technologies
Office of Safety

Enclosures
Request for Federal Aid Reimbursement Eligibility of Highway Safety Hardware

I request the following devices be considered eligible for reimbursement under the Federal-aid highway program.

Enter below all disclosures of financial interests as required by the FHWA `Federal-Aid Reimbursement Eligibility Process for Safety Hardware Devices’ document.

Gibraltar Global, LLC, and Applus IDIADA Karco Engineering, LLC, share no ($0.00) financial interests between the two organizations. This includes no ($0.00) financial interest but not limited to:

i. Compensation, including wages, salaries, commissions, professional fees, or fees for business referrals (dollar values are not needed);
ii. Consulting relationships;
iii. Research funding or other forms of research support;
iv. Patents, copyrights, and other intellectual property interests;
v. Licenses or contractual relationships; or
vi. Business ownership and investment interest.
PRODUCT DESCRIPTION

The Gibraltar Global TL-34 Cable End Terminal consists of one (1) anchor post assembly, one (1) cable release assembly, two (2) J-bolt posts, and two (2) sockets. The terminal is classified as a gating redirective end terminal designed to be used with the Gibraltar Global 4 cable MASH system. The Gibraltar Global Cable Barrier system can be installed with post spacing ranging from 7.0 ft (2.1 m) to 21.0 ft (6.4 m), the post spacing used for this test was 7.0 ft (2.1 m) to evaluate vehicle stability and occupant compartment damage. The as-tested terminal had a total length of 27.5 ft (8.4 m) and the complete installation length was 214.8 ft (65.5 m). As recommended in MASH the cables were tensioned to the manufacturer's specified tension at 100°F, which was 4200 lbs.

There was one modification made during the testing of the Gibraltar Global TL-34 Cable End Terminal during the MASH test program. For Tests 30 and 31, the system included a LON line post installed at the end of the terminal section, 7.5 ft (2.3 m) downstream of the second J-bolt post and 27.5 ft (8.4 m) from the anchor post. The final system design, as used for Tests 32, 33, 34, 35, and 37, the LON line post at the downstream end of the terminal was moved to 14.5 ft downstream from the second J-bolt post. The overall terminal length for both versions of the system was 27.5 ft (8.4 m). Complete details on the design modification is included in Attachment A to this submission and in the complete test reports.

CRASH TESTING

By signature below, the Engineer affiliated with the testing laboratory, agrees in support of this submission that all of the critical and relevant crash tests for this device listed above were conducted to meet the MASH test criteria. The Engineer has determined that no other crash tests are necessary to determine the device meets the MASH criteria.

Engineer Name: Steven Matsusaka

Address: 9270 Holly Rd, Adelanto, CA 92301

Country: United States of America

Full Scale Crash Testing was done in compliance with MASH by the following accredited crash test laboratory (cite the laboratory’s accreditation status as noted in the crash test reports.):

**Laboratory Name:** Applus IDIADA KARCO Engineering, LLC.

**Laboratory Signature:** Steven Matsusaka

**Address:** 9270 Holly Rd, Adelanto, CA 92301

**Country:** United States of America

**Accreditation Certificate Number and Dates of current Accreditation period:** TL-371: July 2019 - July 2022

**Submitter Signature:** Steven Matsusaka

**ATTACHMENTS**

Attach to this form:
1) Additional disclosures of related financial interest as indicated above.
2) A copy of the full test report, video, and a Test Data Summary Sheet for each test conducted in support of this request.
3) A drawing or drawings of the device(s) that conform to the Task Force-13 Drawing Specifications [Hardware Guide Drawing Standards]. For proprietary products, a single isometric line drawing is usually acceptable to illustrate the product, with detailed specifications, intended use, and contact information provided on the reverse. Additional drawings (not in TF-13 format) showing details that are relevant to understanding the dimensions and performance of the device should also be submitted to facilitate our review.

GENERAL INFORMATION
- Test Agency: Applus IDIADA KARCO
- Test No.: P37410-01
- Test Designation: 3-30
- Test Date: 1/29/18

Impact Conditions
- Impact Velocity: 61.48 mph (98.95 km/h)
- Impact Angle: 0.4°
- Location / Orientation: Offset 16.3 in. (414 mm)
- Kinetic Energy: 306.4 kip-ft (415.5 kJ)

Exit Conditions
- Exit Velocity: Vehicle did not exit
- Exit Angle: N/A
- Final Vehicle Position: 135.4 ft. (41.3 m) Downstream
- Exit Box Criteria Met: N/A

Vehicle Snagging: None
Vehicle Pocketing: None
Vehicle Stability: Satisfactory
Maximum Roll Angle: 4.0°
Maximum Pitch Angle: 1.7°
Maximum Yaw Angle: 17.8°

Occupant Risk
- Longitudinal OIV: 8.9 ft/s (2.7 m/s)
- Lateral OIV: 1.0 ft/s (0.3 m/s)
- Longitudinal RA: -5.6 g
- Lateral RA: -3.9 g
- THIV: 8.9 ft/s (2.7 m/s)
- PHD: 5.8 g
- ASI: 0.21

Test Article Deflections
- Static: N/A
- Dynamic: 5.6 ft. (1.7 m)
- Working Width: 5.6 ft. (1.7 m)
- Debris Field: 129.4 ft. (39.4 m) Downstream
- Working Width: 5.3 ft. (1.6 m) Left

Vehicle Damage
- Vehicle Damage Scale: 12-FD-3
- CDC: 12FDEW2
- Maximum Intrusion: 0.2 in. (5 mm)

- Year, Make, and Model: 2012 Chevrolet Silverado 1500
- Curb Mass: 5,060.6 lbs (2,295.5 kg)
- Test Inertial Mass: 4,946.0 lbs (2,243.5 kg)
- Gross Static Mass: 4,946.0 lbs (2,243.5 kg)

**Impact Conditions**
- Impact Velocity: 61.60 mph (99.14 km/h)
- Impact Angle: 5.2°
- Location / Orientation: 0.75 in. (19 mm) left of CL
- Kinetic Energy: 615.8 kip-ft (835.0 kJ)

**Exit Conditions**
- Exit Velocity: 59.36 mph (95.53 km/h)
- Exit Angle: 3.4°
- Final Vehicle Position: 204.9 ft. (62.5 m) Downstream
- Exit Box Criteria Met: N/A

**Occupant Risk**
- Longitudinal OIV: 0.3 ft/s (0.1 m/s)
- Lateral OIV: 3.0 ft/s (0.9 m/s)
- Longitudinal RA: -1.4 g
- Lateral RA: 0.8 g
- THIV: 3.6 ft/s (1.1 m/s)
- PHO: 1.6 g
- ASI: 0.09

**Test Article Deflections**
- Static: N/A
- Dynamic: 3.3 ft. (1.0 m)
- Working Width: 3.3 ft. (1.0 m)
- Debris Field: 64.3 ft. (19.6 m) Downstream
- Vehicle Damage: 7.9 ft. (2.4 m) Left

**Vehicle Damage**
- Vehicle Damage Scale: 12-FD-2*
- CDC: 12FDLW1*
- Maximum Intrusion: Negligible*

* Before secondary impact

### MASH 2016 Test 3-34 Summary

![Test Article Images](image)

#### GENERAL INFORMATION
- **Test Agency**: Applus IDIADA KARCO
- **Test No.**: P38333-01
- **Test Designation**: 3-34
- **Test Date**: 11/20/18

#### TEST ARTICLE
- **Name / Model**: TL-34 Cable Terminal
- **Type**: End Terminal
- **Installation Length**: 318.3 ft. (97.0 m)
- **Terminal Length**: 27.5 ft. (8.4 m)
- **Road Surface**: Compacted soil

#### TEST VEHICLE
- **Type / Designation**: 1100C
- **Year, Make, and Model**: 2013 Kia Rio
- **Curb Mass**: 2,554.0 lbs (1,158.5 kg)
- **Test Inertial Mass**: 2,432.8 lbs (1,103.5 kg)
- **Gross Static Mass**: 2,637.8 lbs (1,196.5 kg)

#### Impact Conditions
- **Impact Velocity**: 62.33 mph (100.31 km/h)
- **Impact Angle**: 15.6°
- **Location / Orientation**: 3.4 in. (86 mm) from midspan
- **Impact Severity**: 22.8 kip-ft (31.0 kJ)

#### Exit Conditions
- **Exit Velocity**: 48.09 mph (77.39 km/h)
- **Exit Angle**: 4.5°
- **Final Vehicle Position**: 195.8 ft. (59.7 m) Downstream
  37.9 ft. (11.6 m) Right
- **Exit Box Criteria Met**: Yes
- **Vehicle Snagging**: None
- **Vehicle Pocketing**: None
- **Vehicle Stability**: Satisfactory
- **Maximum Roll Angle**: 2.9°
- **Maximum Pitch Angle**: 8.9°
- **Maximum Yaw Angle**: -19.5°

#### Occupant Risk
- **Longitudinal OIV**: 10.8 ft/s (3.3 m/s)
- **Lateral OIV**: 12.1 ft/s (3.7 m/s)
- **Longitudinal RA**: -6.1 g
- **Lateral RA**: -8.0 g
- **THIV**: 18.0 ft/s (5.5 m/s)
- **PHD**: 9.8 g
- **ASI**: 0.41

#### Test Article Deflections
- **Static**: N/A
- **Dynamic**: 3.2 ft. (1.0 m)
- **Working Width**: 3.7 ft. (1.1 m)
- **Debris Field**: 100.1 ft. (30.5 m) Downstream
  24.7 ft. (7.5 m) Lateral

#### Vehicle Damage
- **Vehicle Damage Scale**: 11-LFQ-4
- **CDC**: 11LYEW3
- **Maximum Intrusion**: 0.6 in. (15 mm)

---

**Figure 3 Summary of Test 3-34**
**MASH 2016 Test 3-35 Summary**

**Impact Conditions**
- Impact Velocity: 63.23 mph (101.76 km/h)
- Impact Angle: 25.2°
- Location / Orientation: LON Point
- Impact Severity: 121.4 kip-ft (164.5 kJ)

**Exit Conditions**
- Exit Velocity: Out of Camera View
- Exit Angle: N/A
- Final Vehicle Position: 240.9 ft. (73.4 m) Downstream, 18.6 ft. (5.7 m) Right
- Exit Box Criteria Met: Yes
- Vehicle Snagging: None
- Vehicle Pocketing: None
- Vehicle Stability: Satisfactory
- Maximum Roll Angle: 11.3°
- Maximum Pitch Angle: 3.9°
- Maximum Yaw Angle: 24.9°

**Vehicle Damage**
- Vehicle Damage Scale: 11-LFQ-3
- CDC: 11FRMN2
- Maximum Intrusion: Negligible

**Test Article Deflections**
- Static: 3.4 ft. (1.0 m)
- Dynamic: 9.7 ft. (3.0 m)
- Working Width: 9.7 ft. (3.0 m)
- Debris Field: 172.8 ft. (52.7 m) Downstream, 37.0 ft. (11.3 m) Field Side

---

**Test Article**
- Name / Model: TL-3 4 Cable Terminal
- Type: End Terminal
- Installation Length: 335.7 ft. (102.3 m)
- Terminal Length: 27.5 ft. (8.4 m)
- Road Surface: Concrete and compacted soil

**Test Vehicle**
- Type / Designation: 2270P
- Year, Make, and Model: 2012 Chevrolet Silverado 1500
- Curb Mass: 5,049.6 lbs (2,290.5 kg)
- Test Inertial Mass: 5,008.8 lbs (2,272.0 kg)
- Gross Static Mass: 5,008.8 lbs (2,272.0 kg)

### MASH 2016 Test 3-37b Summary

**GENERAL INFORMATION**
- **Test Agency:** Applus IDIADA KARCO
- **Test No.:** P38236-01
- **Test Designation:** 3-37b
- **Test Date:** 9/17/18

**TEST ARTICLE**
- **Name / Model:** TL-3 4 Cable Terminal
- **Type:** End Terminal
- **Installation Length:** 314.8 ft (96 m)
- **Terminal Length:** 27.5 ft (8.4 m)
- **Road Surface:** Compacted soil

**TEST VEHICLE**
- **Type / Designation:** 1100C
- **Year, Make, and Model:** 2012 Kia Rio
- **Curb Mass:** 2,417.3 lbs (1,096.5 kg)
- **Test Inertial Mass:** 2,448.2 lbs (1,110.5 kg)
- **Gross Static Mass:** 2,613.5 lbs (1,185.5 kg)

**Impact Conditions**
- **Impact Velocity:** 62.53 mph (100.63 km/h)
- **Impact Angle:** 24.9°
- **Location / Orientation:** Terminal Post 2
- **Impact Severity:** 56.7 kip-ft (76.9 kJ)

**Exit Conditions**
- **Exit Velocity:** 32.06 mph (51.60 km/h)
- **Exit Angle:** 3.2°
- **Final Vehicle Position:** 107.4 ft (32.7 m) Downstream
- **Exit Box Criteria Met:** N/A

**Occupant Risk**
- **Longitudinal OIV:** 23.3 ft/s (7.1 m/s)
- **Lateral OIV:** 19.7 ft/s (6.0 m/s)
- **Longitudinal RA:** -16.0 g
- **Lateral RA:** 12.9 g
- **THIV:** 39.7 ft/s (12.1 m/s)
- **PHD:** 20.1 g
- **ASI:** 1.39

**Test Article Deflections**
- **Static:** N/A
- **Dynamic:** 4.3 ft (1.3 m)
- **Working Width:** 16.0 ft (4.9 m)
- **Debris Field:** 146.1 ft (44.5 m) Downstream
- **Vehicle Damage Scale:** 01-LFQ-4
- **CDC:** 01 FDEW3
- **Maximum Intrusion:** 0.7 in (18 mm)

Continue interchanging top two cables with top hairpin loop for length of installation.

Cable 4 rests on top of hairpin loop
Cable 3 through top hairpin loop

Cable 3 rests on top of hairpin loop
Cable 4 through top hairpin loop

Note:
First five posts after anchor must alternate side of cable, typical each end.

Cable 4 rests on Cable 3
Cable 3 through J-Bolt

Cable Installation Note:
1. Interchanging top two cables run semi-parallel to each other, never twisting.
2. The top cables alternate passing through the top hairpin loop and resting on the top hairpin loop at each post starting after TP4-4.

Gibraltar Cable Barrier Systems

Scale: NTS
Layout: ANSI B
Date: 12/19/18
Drater: BH
GENERAL NOTES:
1. For additional information contact Gibraltar, Inc. at 1-833-715-0810 or
2. All concrete shall be per specification; minimum 2500 PSI.
3. The Cable Barrier System shall be installed on shoulders or on medians

TERMINAL SECTION
1.1/4"± 1/2" 3. The Cable Barrier System shall be installed on shoulders or on medians

CRP 12" with slopes of 6: 1 or flatter.

If installed on slopes steeper than 6: 1 up to 4: 1 the TL-4 system performs as a TL-3 and Gibraltar must be contacted for various guidelines related to placement. (Max. Post Spacing 18" on 4:1)

4. The Cable Barrier System is accepted by the FHWA Test Level - 4.

5. See the specification for delineation.

6. Rock Clause: Where solid rock is encountered: TP1-4 TP4-4 (no post present)

6.A. For socketed post, continue digging 12" diameter, 15" deep into rock or the required plan depth, whichever comes first.

6.B. For driven post, core drill a 4" diameter hole 18" deep into rock or the required plan depth, whichever comes first.

7. The Gibraltar cable barrier system shall be installed in standard compacted soil. Soil must be well drained.

9. Minimum recommended line post foundation.

9.A. Without mowstrip, 36" Deep x 12" diameter foundations with #3 rebar ring x 8" diameter with two #4 rebar vertical bars 30" long or 30" welded rebar socket.

9.B. With 4" minimum depth hot mix asphalt, 30" deep x 12" diameter foundations with #3 rebar ring x 8" diameter with two #4 rebar vertical bars 30" long or 30" welded rebar socket.

9.C. With 3" minimum depth concrete mowstrip, 24" deep x 12" diameter foundations. (No rebar required).
