■ Chapter 3 Checklist: Collecting, Analyzing, and Sharing Data

Answering these questions will help stakeholders review their SHSP data collection and analysis process and identify opportunities for improvement.

❑ Does your State have a traffic records improvement strategic plan?

❑ Is the TRCC strategic plan integrated and/or coordinated with the SHSP?

❑ Is the TRCC integrated with SHSP implementation efforts?

❑ How is data collection funded? Do the agencies and organizations using the data provide funding support? Does your State make full use of all available funding (section 408, TRCC, etc.) for data collection?

❑ How is data collection coordinated at the regional/local level?

❑ Who provides/collects/processes/analyzes data?

❑ How are data shared at the Statewide level and with whom?

❑ How are data disseminated to and utilized by regional and local agencies?

❑ Are data uniform and coordinated among entities?

❑ Are transportation planning data utilized in SHSP implementation (i.e., travel demand models, Highway Performance Monitoring System (HPMS) data, etc.)?

❑ Are GIS-based tools being utilized for analysis and visualization of roadway inventory and crash data?
